DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 20, 2002 has been entered.

2. Applicant's amendment filed November 20, 2002 is acknowledged and entered. Claims 1-3, 5, 7, 9, 10, 13 and 15-18 are pending.

Claim Rejections - 35 USC § 102

3. Claims 1, 9, 15, 17 and 18 remain rejected under 35 U.S.C. 102(a) as being anticipated by Ding *et al* (*Zhonghua Yi Za Zhi (Natl. Med. J. China)* 1998, 78:261-262), for reasons of record. Applicant's arguments have been carefully considered but not found persuasive. The Office notes the difference in method steps regarding "purification solely by physical means". However, the claims are drawn to a product: an inactivated particle that elicits high titers of neutralizing antibodies. These product-by-process claims are anticipated by the prior art because the process is not given patentable weight.

Claim Rejections - 35 USC § 103

4. Claims 1-3, 5, 7, 9, 10, 13 and 15-18 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Ding (as applied to claims 1, 9, 15, 17 and 18 in the 102(a) rejection) or Huiying *et al* (1998), and further in view of Liao *et al* (6,207,439), for reasons of record.

Applicant's arguments have been carefully considered but not found persuasive. The Office notes the difference in method steps regarding "purification solely by physical means". However, the claims are drawn to a product: an inactivated particle that elicits high titers of neutralizing antibodies. The product-by-process claims are obvious over the prior art because the process is not given patentable weight.

Applicant mainly argues that none of the cited reference teaches purification solely by physical means. However, Liao teaches purification solely by physical means. Applicant argues that Liao uses chemical purification means by using binary ethyleneimide. Ethyleneimide is used for inactivation, according to Budowsky *et al* (CA 2,286,690). Therefore, the rejection stands for reasons of record.

Conclusion

5. No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

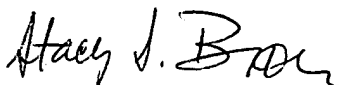

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1648

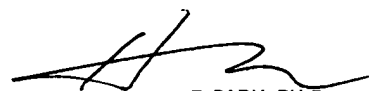

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
